Updated Information on Covid Testing - Getting a PCR test for a close contact of a case?

The Government has issued the following update...

“It is now also possible for close contacts to have a PCR test even where they do not have symptoms through [Get a free PCR test to check if you have coronavirus \(COVID-19\) - GOV.UK \(www.gov.uk\)](#) or by calling 119.

Please note: **if your child has a negative PCR test result this does not alter the self-isolation period as a contact. Close contacts should continue to self-isolate for 10 full days, as they could still become infectious and pass the infection onto others.** Please make sure you read the full text message from NHS Test and Trace when receiving a negative result. This makes clear that you do not need to self-isolate **unless** ‘you’ve been told to self-isolate because you’ve been in close contact with someone who tested positive’ [Negative test result for coronavirus \(COVID-19\) - NHS \(www.nhs.uk\).](#)”
