

Foundation Stage 2 Weekly Home Learning Ideas

Week Commencing 20th April 2020

Over the week it would be lovely for the children to try some of the following activities. Do as many as the activities as possible but not all together space them out throughout the week. Lots of activities can be repeated over the week to

consolidate the children's learning.
Happy Learning.

Phonics

Use the website Phonics Play go to Phase 2 or Phase 3 (challenge) and enjoy playing Buried Treasure with Obb and Bob. The children are all familiar with this game as they have played it our classrooms.

Literacy

Draw a picture of everyone in your family.

Write a sentence about each person in your family - remember how to spell the tricky words and use your home school diary to remind you how we form the letters correctly.

Creative

Make a family lockdown keepsake.

Make salt dough.

500 g plain flour

250g salt

250 mls of water

Make a dough, mould your handprints into the dough and bake on your lowest heat for around 3 hours maybe longer. Then the following day paint each hand print with a different coloured paint.

Post your family keepsake on our school twitter page for everyone to see.

Physical- Fine/Gross Motor Skills

Ball skills - This week practise playing catch. Play with a partner and see how many times you can throw and catch the ball without dropping it. Try using different sized balls maybe a football and a tennis ball. You could record the total using a chalk outside.

Reading

Pick a story and read it with your grown up. Use your bookmark from world book day to help support your child with the reading.

Try playing word snap - cut some paper into rectangles and write words taken from their spelling books. The first person to read the word correctly and find its match pair is the winner!

Number of the Week

Number 11

Count forwards and backwards to 11? Show an understanding of the meaning of 11? Can you clap 11 times? Can you pat 11 times? Count 11 toys and put them in a line. Count 11 counters or 1p coins from a pile. What is one more / one less than 11. Can we form the number 11? Can we add amounts together in different ways to make 11? Can we partition 11 into 2 groups using the counters or pennies? Remember when talking about 11 we don't say 1 and 1, we say "11 - 1 ten and 1 one".

Numberblocks 11 -

The World/SSM

Bake a tray of delicious biscuits and share them with your family. If you can use different sized or shaped cutters and talk about what is the same and what is different.

PHSE

Make a happy card and post it through one of your neighbours'/ family members letter box or under their bedroom door. Make their day and pop a smile on their face.

Write a happy thought and a smiley face on love heart shaped paper and stick it up somewhere where all your family can see it.

Website of the week

The website of the week is espresso. Some fantastic videos and learning opportunities available to share!
